

Merge zones for more room to cook with the Bridge Function

The 600 Bridge Induction Hob lets you combine two separate cooking zones to create one large surface. With the temperature and time settings automatically aligned, it's ideal for making the most of planchas or roasting pots.

Product Benefits & Features

Merge zones for more room to cook with the Bridge function

The Bridge function lets you combine two separate cooking zones to create a single large surface. With the temperature and time settings automatically aligned, it's ideal for making the most of planchas or roasting pots.

Tailored to the size of your pans with Infinite self-sizing zones

The Infinite self-sizing cooking zones adapt to the size of your pans as soon as they are covered. The zones offer total coverage, whatever the size of your pot, delivering heat with no performance loss. Enjoy accurate and efficient cooking with our self-sizing zones.

Hob2Hood® for pure convenience

The Hob2Hood® function wirelessly connects your hob to your hood. Start cooking, and the hood will automatically adjust the settings, providing the best extraction based on the power selected on the hob. It does the hard work for you.

Direct touch control for every zone

Easily adjust your hob's temperature settings with our direct touch controls. Each cooking zone has an individual power control, so it's clear to see and simple to change the heat settings. And as it's one smooth surface, it's easy to clean.

Intense heat, in an instant with PowerBoost

Activate the PowerBoost function for an instant burst of heat during cooking. It's ideal for getting dishes ready faster. You can boil water quicker than ever before, and get pans ready for searing when you need them.

- Left front zone: 2300/3200W/210mm
- Left rear zone: 2300/3200W/210mm
