Electrolux ER82UW4SW 800 Plus Ultra Reach Robot Vacuum Cleaner 40

ER82UW4SW

7,89 cm, ultra-slim, smart navigation for an effortless clean
Forget chasing dust when you're busy. This robot navigates your home to clean even hard-to-reach areas. It vacuums, mops, automatically empties dust and hygienically cleans the mops with hot water and hot air, keeping your home fresh.

Product Benefits & Features

Navigates your home with care and precision
With LiDAR navigation, 200+ obstacle identification* and up to 30 mm threshold** climbing, the robot cleaner navigates smartly across your home while delivering thorough edge-to-edge cleaning with zero gaps to edges and walls.

*The product uses a camera with pre trained AI for obstacle recognition. User data is not used to train the AI.
**Based on internal tests on dry hard floors.

Up to 40% more suction power* and efficient mopping
Powered by HyperSuction technology, the robot removes up to 100% of large debris as it cleans**, while adapting suction to different floor types. It lifts the mops on carpets to deep clean, and wet mops hard floors for a thorough clean.

*Based on internal test comparing suction power on carpet between this product and 800 Robot Vacuum Cleaner. Test based on IEC 62885-2 standard.

Less maintenance, more time for you.
With up to 30 days hands-free dust emptying*, the All-in-One station refills water, applies detergent**, and washes mops hygienically clean with hot water before drying them. Anti-tangle technology reduces brush tangles for smoother cleaning performance.

*Based on internal tests of running the cleaner 6x times a week and picking up 50 g debris per session. Number of days can vary depending on actual usage.

Award-winning* app that fits seamlessly into your life
The intuitive app gives you the freedom to choose how you clean your home. Personalise settings for each room, decide how and when to clean or simply let the robot decide with smart mode. Smart cleaning without making life complicated.

*The Electrolux app has received a Red Dot Design award (2025) and an iF Design award (2026).

Privacy built in, for your peace of mind.
Designed with your privacy in mind, the robot operates with no microphone and zero image uploads. Camera images are analysed instantly inside the robot then deleted. Built-in security, for your peace of mind.
